Steps:
1. Start with the basic html and create the tables that the images will be in
2. Add the images into a separate folder
3. Create a css file and connect it to the html
4. Add all the images
5. Make sure all the links connect to the pages they're supposed to
6. Stylize it with specifics such as fonts and background color
7. Go through it and make sure all things work
8. Add anything else that might make it better
